

## Clinical Rehabilitation and Mental Health Counseling Performance Report

The following program performance and outcome statistics are provided to the public and our stakeholders. This information is based on data gathered from 2010-2015.

1. **Student Retention Rate** (% of students who enroll and graduate each year for a 3-year period): **Over the period of 2008 to 2012, 59 students enrolled in our program. Of those 59 students, 48 students graduated (81% retention) and 11 students left the program (19%).**
2. **Average Program Completion time: 3.06 Years**
3. **Estimated Cost of Program Attendance: Approximately \$8,300 annually/25K for 3 year program (includes tuition and books)**
4. **Available Scholarships: Rehabilitation Services Administration Long Term Training Grant (15K annually). Additional Scholarship opportunities are available through the University and for those who are in both the MFT program and the CRMH program.**
5. **Employment Rate of Graduates within 6 months of graduating: 83% of graduates (from 2010 to 2014) obtained a job within six months of graduating.**
6. **Employment Settings Where Graduates Work: Of the 58 graduates from 2010 until 2014, 52% work in non-profit mental health/rehab/substance abuse agencies including residential settings; 14% work in public Vocational Rehabilitation settings (California Department of Rehabilitation); 12% work in college settings (community college and 4-year Universities); 3% work in city/state agencies (e.g., regional centers, health and human services); 2% work in hospitals and 2% are in private practice.**
7. **Eligibility for Licensure by Program Graduates: Graduates are eligible for California Licenses for Professional Clinical Counselors by completing the 60 unit CRMH curriculum plus a 3 unit course in psychopharmacology and a 3 unit course in crisis intervention.**

8. **Passing Rates of Final Culminating Experience Paper: Since 2012, of the 36 students who attempted their Culminating Experience Paper, 97% (35) completed the requirements; 88% completed the project within one semester; 8% completed the project within two semesters, and 2% did not complete the project.**
